## Overview and Summary

The Nadur Local Council based its forecasts for the annual budget for year 2017 primarily on the actual figures for year ended 31 December 2016. In relation to expenses as a whole, an allowance of $1 \%$ increase on 2016 actual figures was provided for in order to compensate for inflation and related increase in prices. With respect to income, however, it is important to point out that the annual allocation, being the main income for the Local Council, was provided for in the budget based on the actual allocation to be received in 2017 from the Central Government.

Over the last years, the Nadur Local Council's financial position was characterised by a fiscal deficit arising from several capital projects undertaken by past administrations which were not suitably financed. The current administration as it has been doing from its inception is continuously trying to address this situation mainly by:
(i) Giving particular attention to all recurrent expenditure and ensuring that all expenses made are necessary and give the best value added;
(ii) Not undertaking any capital expenditure unless such expenditure is mainly financed by alternative sources. In fact, as can be seen from the annual budget for 2017, only Euro 15,000 was provided for in respect to capital expenditure. Such amount represents the proportion of funds which the Local Council will be liable to pay from the overall capital project. Also, as can be seen from the annual budget, such provision for capital expenditure will not impair the financial situation of the Local Council; and
(iii) Providing in the annual budget for 2017, the repayment of part of the deficit of the Local Council. Such repayment portion was arrived at after considering the income and expenditure of the Local Counil for the coming years. The Nadur Local Council forecasts to revert its financial deficit situation by the year 2020.
